

February 27, 2020

To Whom It May Concern:

GuidePoint Security, LLC (“GuidePoint”) has performed a China National Standards on Information Security Technology – Personal Information Security Specification GB/T 35273-2017 Gap Assessment for comScore, Inc. (“comScore”) while acting as an independent security assessor. GuidePoint found comScore to be fully compliant.

comScore is a Personal Information (PI) controller as defined by the China National Standards on Information Security Technology – Personal Information Security Specification GB/T 35273-2017 (“the Specification”). GuidePoint Security LLC (“GuidePoint”) provided comScore with professional information assurance services to perform a Specification Gap Assessment and prepared the Specification Gap Assessment Report suitable for comScore to understand its current compliance status relative to the Specification. The assessment evaluated and measured comScore’s security practices and current compliance with the Specification and the external requirements specified by same.

GuidePoint has made every effort to perform a thorough and comprehensive analysis and to provide appropriate remedial advice. However, inherent limitations, errors, misrepresentations, and changes to the assessed environment may have an impact on the findings and recommendations provided, which are the result of a point-in-time assessment based on the state of the assessed environment as of the time period during which the engagement was executed (November 12, 2019-February 5, 2020). GuidePoint therefore does not provide any assurance related to configuration or control modifications in the assessed environment, changes in regulatory or compliance requirements, discoveries of new vulnerabilities and attack techniques, or any other future event that may impact comScore’s security or compliance posture.

The information contained in report(s) provided to comScore as a result of this engagement represent a fair and unbiased assessment of comScore’s environment based on the agreed-upon criteria as defined in the statement of work. GuidePoint has provided said report(s) solely for private and internal use by comScore, and they may not be shared or redistributed without GuidePoint’s express written consent. GuidePoint’s assessments focus exclusively on information security; the conclusions arrived at should not be considered to be a representation or endorsement of comScore’s products or services.

Sincerely,

Debra Vela
